

Gundlapalli Saradha Janaki

Genetics and Molecular Biology | Alumni, The Apollo University

About

Gundlapalli Saradha Janaki is an accomplished alumna of **The Apollo University**, where she pursued the **Genetics and Molecular Biology** stream as part of her four-year programme. Her academic journey at the university played an important role in developing her passion for scientific research and shaping her career aspirations.

During her time at The Apollo University, she had the opportunity to work under an esteemed faculty panel and gain valuable exposure to research. The university provided her with an encouraging academic environment and numerous opportunities to explore her interests in the field of biological sciences.

Academic & Research Journey

Her passion for research was strengthened through the guidance and mentorship of **Dr. R. Satyanarayana** and **Dr. G. Gopi Krishna**, who played an important role in guiding her academic and career development.

As part of her research journey, she had the opportunity to undertake an **internship at IIT Tirupati**, gaining valuable exposure to an advanced research environment and further developing her interest in scientific investigation.

Publications & Scholarly Contributions

Saradha Janaki has contributed to research publications in areas related to **cancer therapy, phytochemicals, molecular targets, and metabolic engineering**. Her scholarly contributions include:

- **Modeling the Effect of Docosahexaenoic Acid (DHA) in Cancer Therapy**
- **Heptadecanol: A Phytochemical Multi-Target Inhibitor of SMYD3 & GFPT2**
DOI: 10.1007/s10822-025-00627-y
- **Chapter 16 – Future Perspectives and Emerging Trends**
A book chapter in *Novel Bioproducts through Metabolic Engineering of Secondary Metabolites*, published by **ScienceDirect – Elsevier (Academic Press)**.
DOI: 10.1016/B978-0-443-40529-7.00020-2

Areas of Interest

- Genetics and Molecular Biology
- Cancer Research
- Cancer Therapy
- Phytochemicals
- Molecular Research
- Metabolic Engineering
- Scientific Research

Alumni Highlight

The Department of Biomedical Sciences played a significant role in shaping Saradha Janaki's scientific journey and nurturing her passion for research. Her academic experience, research exposure, internship at IIT Tirupati, and contributions to scholarly publications reflect her dedication to continuous learning and scientific exploration.

Her journey demonstrates how a strong academic foundation, inspiring mentorship, and meaningful research opportunities can help students discover their potential and pursue impactful careers in the life sciences.

The Department of Biomedical Sciences takes pride in Saradha Janaki's achievements and her continued contribution to the field of scientific research.
