

Apollo University Student Wins International AI Hackathon Award

Recognition for innovation in Artificial Intelligence and healthcare technology

Achievement Overview

Mr. Vinay, a student of The Apollo University, Chittoor, received international recognition after winning First Prize in the Google Cloud Rapid Agent Hackathon (Elastic Track), a global innovation competition. His achievement highlights the potential of student-led artificial intelligence solutions to address real-world healthcare challenges.

About the Winning Project – CrisisRoute AI

The award-winning project, *CrisisRoute AI*, uses artificial intelligence to support emergency healthcare decision-making. The system is designed to help patients reach the most suitable hospital in the shortest possible time. By aiming to reduce treatment delays, improve emergency response systems and strengthen critical healthcare outcomes, the project demonstrates how AI can be applied to practical healthcare needs.

Recognition and Institutional Support

The achievement was congratulated by university leadership and faculty members, who highlighted the importance of research, innovation, technology-driven solutions and experiential learning. The recognition was also described as reflecting the university's focus on academic excellence and innovation.

A Significant Milestone

Winning an international AI hackathon represents a significant academic and professional milestone. It demonstrates the value of interdisciplinary skills, creativity and the application of emerging technologies to

societal and healthcare challenges. The achievement also brings global recognition to The Apollo University and encourages students to develop innovative solutions with meaningful social impact.

Celebrating Innovation and Achievement

DECCAN FREEDOM NEWS

■ Chittoor

A student of The Apollo University, Chittoor, Mr. Vinay, has achieved international recognition by winning the First Prize at the Google Cloud Rapid Agent Hackathon (Elastic Track), a global innovation competition. He received a cash award of USD 5,000 (approximately ₹4.30 lakh) for his innovative AI-based project, CrisisRoute AI.

The project uses Artificial Intelligence technology to help emergency patients reach the most suitable hospital in the shortest possible time. The solution aims to reduce treatment delays, improve emergency response systems, and enhance critical healthcare outcomes.

Congratulating Mr. Vinay on his remarkable achievement, Dr. Nitin M. Nagarkar, Vice Chancellor of The Apollo University, said the institution is committed to promoting research, innovation, and technology-based solutions to address real-world challenges. He stated that the international recognition reflects the

university's focus on academic excellence and innovation.

Dr. Alfred J. Augustine, Pro Vice-Chancellor, and S. Anil Kumar, Registrar, also congratulated Mr. Vinay and wished him continued success in his academic and professional career.

Speaking on the occasion, Prof. R. Satyanarayana, Head of the Department of Biomedical Sciences, said the achievement highlights the university's commitment to quality education, research and experiential learning. He added that students are encouraged to develop innovative solutions that create a positive impact on healthcare and society.

The felicitation programme was attended by Dr. Nitin M. Nagarkar, Prof. R. Satyanarayana, Dr. G. Gopikrishna, Programme Coordinator, and Dr. R. Sriroop Reddy, Project Coordinator, who appreciated Mr. Vinay's outstanding accomplishment. The Apollo University congratulated Mr. Vinay for bringing global recognition to the institution and wished him further success in his future endeavours.
